Join the hundreds of people holding manufacturers accountable for defective and unsafe pressure cookers by asserting your pressure cooker personal injury claim.

Pressure cooker manufacturers market their products as a quick, healthy and safe way to cook. However, the reality is that many of the pressure cookers on the market have serious design flaws that can lead to severe malfunctions. These malfunctions can cause steam and scalding hot liquids and food to explode out of the pressure cooker, burning the user and anyone nearby.

The pressure cooker litigation team at Johnson Becker is experienced at holding manufacturers responsible for defective products. Over the last four years, Johnson Becker has represented over 500 people in more than 40 states who have been burned by exploding pressure cookers. In addition, we have handled pressure cooker cases against virtually all of the major name-brand manufacturers.

Each pressure cooker lawsuit is dependent on its own unique facts, but our firm continues to successfully file lawsuits against the manufacturers of defective pressure cookers and obtain settlements for our clients. We believe that holding manufacturers responsible for our clients' injuries not only helps our clients, but prevents future injuries by forcing manufacturers to evaluate and improve the safety of their products.

the pressure cooker's pot during the normal, directed use of the pressure cooker, allowing its scalding hot contents to be forcefully ejected from the pressure cooker and onto Plaintiff.

4. As a direct and proximate result of Defendants' conduct, the Plaintiff in this case incurred significant and painful bodily injuries, medical expenses, wage loss, physical pain, mental anguish, and diminished enjoyment of life.

THE PARTIES

5. Plaintiff was, at all relevant times, a resident of the City of Shreveport, Parish of Caddo Rouge, State of Louisiana. Plaintiff has resided in the City of Shreveport, Parish of Caddo, State of Louisiana from the time of her injuries through the present and is therefore deemed a citizen of this state for purposes of diversity jurisdiction under 28 U.S.C. § 1332.

6. Defendant SharkNinja designs, manufacturers, markets, imports, distributes and sells a variety of consumer products, including the subject "Ninja Foodie" pressure cookers.

7. Defendant SharkNinja is a Massachusetts Corporation incorporated in the State of Delaware and has a principal place of business located at 89 A ST # 100, Needham, MA 02494. Defendant SharkNinja has a registered service address Corporation Trust Center, 1209 Orange Street, Wilmington, DE 19801. Defendant SharkNinja is therefore a citizen of the State of Massachusetts for purposes of diversity jurisdiction under 28 U.S.C. § 1332.

JURISDICTION AND VENUE

8. This Court has subject matter jurisdiction over this case pursuant to diversity jurisdiction prescribed by 28 U.S.C. § 1332 because the matter in controversy exceeds the sum or value of \$75,000, exclusive of interest and costs, and there is complete diversity between the parties.

9. Venue is proper in this Court pursuant to 28 U.S.C. § 1391 because all or a substantial part of the events or omissions giving rise to this claim occurred in this district.

10. Venue is also proper in this Court pursuant to 28 U.S.C. § 1391 because Defendant has sufficient minimum contacts with the State of Louisiana and intentionally availed itself of the markets within Louisiana through the promotion, sale, marketing, and distribution of its products.

FACTUAL BACKGROUND

11. Defendant SharkNinja is engaged in the business of designing, manufacturing, warranting, marketing, importing, distributing and selling the pressure cookers at issue in this litigation.

12. Defendant SharkNinja warrants, markets, advertises and sell its pressure cookers as a means to cook “easy” and “convenient” allowing consumers to “cook 70% faster than traditional cooking method[s].”¹

13. Defendant SharkNinja boasts that its pressure cookers have “14 safety features,”² which purport to keep the user safe while cooking.

14. For example, according to the Owner’s Manual accompanying the individual unit sold, the pressure cookers are equipped with a “safety feature” that prevents the lid from unlocking until “the unit is completely depressurized.”³

15. By reason of the forgoing acts or omissions, the above-named Plaintiff and/or her family purchased the pressure cooker with the reasonable expectation that it was properly designed and manufactured, free from defects of any kind, and that it was safe for its intended, foreseeable use of cooking.

² *Id.*

³ Attached hereto as “Exhibit A” and incorporated by reference is the “Ninja Foodi 10-in-1 8 Qt XL Pressure Cooker OS400 Series” Owner’s Manual. *See*, e.g. pgs. 15, 23.

16. On or about April 14, 2020, Plaintiff was using the pressure cooker designed, manufactured, marketed, imported, distributed and sold by Defendant SharkNinja for its intended and reasonably foreseeable purpose of cooking.

17. While the pressure cooker was in use for cooking, the pressure cooker's lid unexpectedly and suddenly blew off the pot in an explosive manner. The contents of the pressure cooker were forcefully ejected out of the pot and onto Plaintiff, causing severe, disfiguring burns to, *inter alia*, her arms and breasts.

18. Plaintiff and her family used the pressure cooker for its intended purpose of preparing meals and did so in a manner that was reasonable and foreseeable by the Defendant SharkNinja.

19. However, the aforementioned pressure cooker was defectively and negligently designed and manufactured by Defendant SharkNinja in that it failed to properly function as to prevent the lid from being removed with normal force while the unit remained pressurized, despite the appearance that all the pressure had been released, during the ordinary, foreseeable and proper use of cooking food with the product; placing the Plaintiff, her family, and similar consumers in danger while using the pressure cookers.

20. Defendant SharkNinja's pressure cookers possess defects that make them unreasonably dangerous for their intended use by consumers because the lid can be rotated and opened while the unit remains pressurized.

21. Further, Defendant SharkNinja's representations about "safety" are not just misleading, they are flatly wrong, and put innocent consumers like Plaintiff directly in harm's way.

22. Economic, safer alternative designs were available that could have prevented the pressure cooker's lid from being rotated and opened while pressurized.

23. As a direct and proximate result of Defendant SHARKNINJA's intentional concealment of such defects, its failure to warn consumers of such defects, its negligent misrepresentations, its failure to remove a product with such defects from the stream of commerce, and its negligent design of such products, Plaintiff used an unreasonably dangerous pressure cooker, which resulted in significant and painful bodily injuries.

24. Consequently, the Plaintiff in this case seeks compensatory damages resulting from the use of Defendant SharkNinja's pressure cooker as described above, which has caused the Plaintiff to suffer from serious bodily injuries, medical expenses, lost wages, physical pain, mental anguish, diminished enjoyment of life, and other damages.
